

# Get started with your aiFi

## Start using your aiFi

1. Charge your aiFi. We recommend to charge the battery for at least three hours before using it the first time.
2. Start your aiFi by holding your finger on the upper button for three seconds.
3. The mood light on your aiFi is pulsating, which means it is ready for Bluetooth® pairing. If not pulsating, press the middle button for three seconds.
4. Open the Bluetooth® menu in your music device and choose "aiFi Sam" from the list. (You can change name of your aiFi in the aiFi app.)
5. Connect to "aiFi Sam".
6. Start playing music from your device. Enjoy!

*Note: For the best sound performance, let your aiFi play varying types of music for at least eight hours at no more than 70% volume, before cranking up the volume.*

## How to stack your aiFi

1. Make sure that the aiFis you want to stack are charged.
2. Start to play music from one aiFi.
3. Stack the aiFis on top or beside each other and they will start playing together. When stacking on top: see to it that the upper aiFi fits into the grooves of the lower one. When stacking sideways: remove one of the aiFi Coins™ and slide the aiFi's together, the remaining coin fits on the side of the other aiFi.
4. When the mood lights flash and the stack turns into one colour you will hear the volume increase.
5. Stack on. Play on.

*Note: the WaveDot™ patterns (●●●●) are aligned so that the communications between the units is secured.*

## The aiFi app

The aiFi app works as a remote control for your aiFi. It also enables additional features such as the aiPlay™ which makes it possible for everyone connected to the stack to be a DJ. Please download the aiFi app to your mobile device.

**WARNING!** Listening to music at excessive volume for extended periods of time can cause damage to your hearing. Please use with care.

# Quick Guide

Thanks for choosing aiFi®. This Quick Guide gives you a general idea of the product and how to use it. To control your aiFi use the touch control on the back or the aiFi app. For user guide and tutorials, please visit [www.aifi.se/support](http://www.aifi.se/support).

## Power

Power on the aiFi by pressing the power button for three seconds (long press). Double tap the button to check the battery status.

## Volume

Swipe the three touch buttons up or down to control the volume. To mute, swipe down twice in rapid pace. Swipe upwards to increase the volume again.

## AUX jack

Line-In 3.5 mm or optical S/PDIF 3.5 mm

## aiFi Coin™

The aiFi Coin aligns your aiFis sideways. One coin should be removed when stacked sideways.

## Source select/Bluetooth

Double tap to switch between Bluetooth and AUX jack. Long press to control the Bluetooth® function.

## Light control

aiFi comes with a mood light function that can be set to different colors – or be turned off. Double tap to instantly dim the moodlight. Long press to control the moodlight functions.

## aiFi Coin™ resting Spot

You can rest your aiFi Coin™ here when stacking aiFis horizontally.

## AC adapter jack

Your aiFi is battery operated and can also be used connected to an AC power source via the aiFi power adapter.
